Jacki,

I just went through my email and deleted the medical data sent 3/5/12 and 5/15/12. It is secure for ATSDR to have the data under confidential status given Michelle is a doctor, but not sure about me, plus I am not a physician so it's not appropriate for me to have that type data. Thanks for pointing it out.

Kristen,

I noticed you were cc'd on the emails also. If you have the emails in your email box will you delete also--for security purposes.

I had sent both you and Kristen some of my medical records, just want to make sure they are not left in any files that have open access or have already been given to someone by mistake.

Jacki,

I am cc'ing Chris Poulet with ATSDR, to my knowledge they are the only Agency that has received medical records. I do not have any medical records, only data from environmental sampling.

If your doctor has additional information about other's in the area that are experiencing some of the same symptoms and she is willing to discuss it, she would talk directly with ATSDR.

Chris,

Could you please address the confidentiality questions below?

Thanks,  
Tricia

Subject: medical records

---

Over the past several months I have sent you and others in the Region 8 some of my medical records, I would like to know who has had access to these records and that they have been kept confidential. In the past with the ATSDR I indicated that none of my medical information be shared with the State of ND Health Dept and I hope this request still is in enforcement.

Per our conversation yesterday about contacting a doctor I see in ND and having her speak with your department, I will do this only if none of my medical information is given to the State of ND, I will request she only speak with the ATSDR. I have made this quite clear in the past that my medical records are confidential and are not to be given to anyone. This advice was given to me by an attorney for good reason.
